

Did Your Dog Participate In A NAD (Neuroaxonal dystrophy) Study About 10 Years Ago?

About 10+ years ago Dr. Linda Cork collected blood samples from dogs that were affected with NAD. Dr. Cork is retiring, and gave the samples to Dr. Danika Bannasch at the University Of California - Davis. If your dog participated in this study, could you please contact Dr. Bannash at dlbannasch@ucdavis.edu She is trying to find out some more information about the dogs who gave samples. Also if you currently have a dog with NAD, please contact Dr. Bannash as well.
