PICTORIAL EDITOR.....Catherine Thompson  
RD 2, Box 384  
Freehold, NJ 07728

The American Rottweiler Club is proud to present its fourth edition of the Rottweiler Pictorial.

Once again two sections are included - the first for titled dogs; the second for Production Award Winners and Producers of Merit. There is a page listing all the Gold, Silver and Bronze Award Winners before their respective section.

You will find a copy of the current AKC approved Standard of the Breed following this message, and a list of TOP TEN Winners in the back, along with a list of Best in Show (all breeds) and the Select Winners at our National Specialties.

I sincerely hope you will find this book both informative and enjoyable.

Catherine Thompson, Editor.

## REVISED STANDARD FOR ROTTWEILERS

The Board of Directors of The American Kennel Club has approved the following revised Standard for Rottweilers. September 11, 1979

**GENERAL APPEARANCE** - The ideal Rottweiler is a large, robust and powerful dog, black with clearly defined rust markings. His compact build denotes great strength, agility and endurance. Males are characteristically larger, heavier boned and more masculine in appearance.

**SIZE** - Males - 24" to 27", Females - 22" to 25"

Proportion should always be considered rather than height alone. The length of the body, from the breast bone (Sternum) to the rear edge of the pelvis (Ischium) is slightly longer than the height of the dog at the withers; the most desirable proportion being as 10 to 9. Depth of chest should be fifty percent of the height.

Serious Faults: lack of proportion, undersized, oversized.

**HEAD** - Of medium length, broad between the ears, forehead line seen in profile is moderately arched. Cheekbones and stop well developed; length of muzzle should not exceed distance between stop and occiput. Skull is preferred dry; however, some wrinkling may occur when dog is alert.

**MUZZLE** - bridge is straight, broad at base with slight tapering towards tip. Nose is broad rather than round, with black nostrils.

**LIPS** - always black; corners tightly closed. Inner mouth pigment is dark. A pink mouth is to be penalized.

**TEETH** - 42 in number (20 upper and 22 lower); strong, correctly placed, meeting in a scissors bite - lower incisors touching inside of upper incisors.

Serious Faults - any missing tooth, level bite.

\*Disqualifications - undershot, overshot, four or more missing teeth.

**EYES** - of medium size, moderately deep set, almond shaped with well-fitting lids. Iris of uniform color, from medium to dark brown, the darker shade always preferred.

Serious Faults - yellow (bird of prey) eyes; eyes not of same color; eyes unequal in size or shape. Hairless lid.

**EARS** - pendant, proportionately small, triangular in shape; set well apart and placed on skull so as to make it appear broader when dog is alert. Ear terminates at approximately mid cheek level. Correctly held, the inner edge will lie tightly against cheek.

**NECK** - Powerful, well muscled, moderately long with slight arch and without loose skin.

**BODY** - Topline is firm and level, extending in straight line from withers to croup.

**BRISKET** - deep, reaching to elbows.

**CHEST** - roomy, broad with well pronounced forechest.

**RIBS** - well-sprung.

**LOIN** - short, deep and well muscled.

**CROUP** - broad, medium length, slightly sloping.

**TAIL** - Normally carried in horizontal position - giving impression of an elongation of top line. Carried slightly above horizontal when dog is excited. Some dogs are born without a tail, or a very short stub. Tail is normally docked short close to the body. The set of the tail is more important than length.

**FOREQUARTERS** - Shoulder blade - long, well laid back at 45 degree angle. Elbows tight, well under body. Distance from withers to elbow and elbow to ground is equal.

**LEGS** - strongly developed with straight heavy bone. Not set closely together.

- PASTERNS - strong, springy and almost perpendicular to ground.
- FEET - round, compact, well arched toes, turning neither in nor out.  
Pads thick and hard; nails short, strong and black. Dewclaws may be removed.
- HINDQUARTERS - Angulation of hindquarters balances that of forequarters.
- UPPER THIGH - fairly long, broad and well muscled.
- STIFLE JOINT - moderately angulated.
- LOWER THIGH - long, powerful, extensively muscled leading into a strong hock joint; metatarsus nearly perpendicular to ground. Viewed from rear, hind legs are straight and wide enough apart to fit in with a properly built body.
- FEET - somewhat longer than front feet, well arched toes turning neither in nor out. Dewclaws must be removed if present.
- COAT - Outer coat is straight, coarse, dense, medium length, lying flat. Undercoat must be present on neck and thighs, but should not show through the outer coat. The Rottweiler should be exhibited in a natural condition without trimming, except to remove whiskers if desired.
- Fault - wavy coat. Serious Faults-excessively short coat, curly or open coat; lack of undercoat.
- \*Disqualification - long coat.
- COLOR - Always black with rust to mahogany markings. The borderline between black and rust should be clearly defined. The markings should be located as follows; a spot over each eye; on cheeks, as a strip around each side of the muzzle, but not on the bridge of nose; on throat; triangular mark on either side of breastbone; on forelegs from carpus downward to toes; on inside of rear legs showing down the front of stifle and broadening out to front of rear legs from hock to toes; but not completely eliminating black from back of legs; under tail. Black penciling markings on toes. The undercoat is gray or black. Quantity and location of rust markings is important and should not exceed ten percent of body color. Insufficient or excessive markings should be penalized.
- Serious Faults - excessive markings; white markings any place on dog (a few white hairs do not constitute a marking) light colored markings.
- \*Disqualifications - any base color other than black; total absence of markings.
- GAIT - The Rottweiler is a trotter. The motion is harmonious, sure, powerful and unhindered, with strong fore-reach and a powerful rear drive. Front and rear legs are thrown neither in nor out, as the imprint of hind feet should touch that of forefeet. In a trot, the forequarters and hindquarters are mutually co-ordinated while the back remains firm; as speed increases legs will converge under body towards a center line.
- CHARACTER - The Rottweiler should possess a fearless expression with a self assured aloofness that does not lend itself to immediate and indiscriminate friendships. He has an inherent desire to protect home and family, and is an intelligent dog of extreme hardness and adaptability with a strong willingness to work.
- SHYNESS - A dog shall be judged fundamentally shy if, refusing to stand for examination it shrinks away from the judge; if it fears an approach from the rear; if it shies at sudden or unusual noises to a marked degree.
- VICIOUSNESS - A dog that attacks or attempts to attack either the judge, or its handler is definitely vicious. An aggressive or belligerent attitude towards other dogs shall not be deemed viciousness.
- FAULTS - The foregoing is a description of the ideal Rottweiler. Any structural fault that detracts from the above described working dog must be penalized to the extent of the deviation.

## SELECT AWARDS

Select Awards are awards made beyond Best of Breed and Best of Opposite Sex at the ARC National Specialties.

All dogs eligible for Best of Breed competition shall be considered for these awards.

At the discretion of the intersex judge, at the ARC annual specialty the maximum number of Select Awards that may be given shall be 10% of the Best of Breed entry, including veterans and winners. That 10% is in addition to the Best of Breed and Best of Opposite Sex winners with no limitations as to sex.

There must be 6 or more entries to increase the number of Select Awards by one. The Best of Breed winner shall be known as Select 1, the Best of Opposite Sex shall also be known as Select 1, all others chosen shall be known simply as Select.

### 1985 SELECT AWARDS

Judge: Mrs. Barbara Hoard Dillon

Best of Breed/Select 1	CH Von Bruka Fiona (B)
Best of Opposite/Select 1	Arri von der Hembachbrucke (D)
Select	CH Bronco vom Rauberfled (D)

American Rottweiler Club  
PRODUCTION AWARDS

These awards are open to all Rottweilers, living or dead, that have distinguished themselves by their American titled offspring. As production points accumulate, the individual sire or dam may receive the next higher award.

To be eligible for any award, a Rottweiler must meet the following four (4) requirements:

1. have produced at least one (1) AKC Champion of Record.
2. have produced at least one (1) advanced obedience titled dog (CDX, TDX, or SchH 1)
3. have produced at least three (3) titled offspring.
4. have met the point requirements.

BRONZE PRODUCTION AWARD		SILVER PRODUCTION AWARD		GOLD PRODUCTION AWARD	
Males	25 points	Males	50 points	Males	75 points
Females	15 points	Females	30 points	Females	45 points

Production Points are calculated as follows:

AKC Champion	3 points
AKC CD	1 point
AKC CDX	2 points (3 points total, CD & CDX)
AKC UD	3 points (6 points total, CD & CDX & UD)
AKC OTCH	3 points (9 points total, CD & CDX & UD & OT)
AKC TD	1 point
AKC TDX	2 points (3 points total, TD & TDX)
SchH I	2 points
SchH II	2 points (4 points total, I & II)
SchH III	2 points (6 points total, I & II & III)
FH	2 points

You must make application for these awards. It must contain the name of the dog or bitch, breeder, owner, owner's address and phone number. It must also contain the names and titles of the offspring. In order to verify the titles the application must contain either the issue of the AKC Gazette or a copy of the certificate. Schutzhund titles must be verified by a copy of the scorebook or page in USA or DVG magazine. If there is a problem with the verification please contact either Mildred or Cathy. Send application to:

Mildred Bailey  
9130 W. Marshall  
Glendale, AZ 85305

or

Cathy Thompson  
RD 2, Box 384  
Freehold, NJ 07728
